

Zytronic is honoured as a finalist at the Electronics Industry Design Awards

The prestigious Electronics Industry Design Awards attracted 120 nominations from engineering companies across the UK, for eight awards categories this year. Of these nominations, just 36 made it through to the finals, after assessment by a team of independent judges. Zytronic was honoured to be selected as a finalist in the 'Design Solution of the Year' category, for its Zytouch touchscreen technology.

The awards ceremony took place at the Effingham Park Copthorne Hotel on the night of Thursday, 23rd September. Bill Moodie, Sales Director, represented Zytronic on the night and is seen in the photograph (third from the right), collecting the finalist certificate.

The winner of the Design Solution category was Plextek Ltd for the Gizmondo game pad. The other finalists in this category were Lascar Electronics' EL-USB-1 data logger and Silicon Laboratories' Si4300 CMOS Power Amplifier.
