

ZYTRONIC

The world at your finger tips

CLIENT:

LOCATION:

Slovenia

MARKET SECTOR:

TECHNOLOGY:

ZyTouch™

WHAT WE DID:

Zytronic adds rugged touch capability to iMotion® high-definition digital signage for outdoor use.

The units are purpose designed for use in all locations, including demanding public outdoor environments. The very large display is presented in a choice of portrait or landscape orientation, and in optional 65" or 46" sizes.

Infinitus of Slovenia, conceived iMotion® to deliver the advantages of cutting-edge technology with complete reliability.

The sensor features an immensely tough 6mm + 6mm laminated and toughened glass featuring an antireflective coating to enhance readability for users. Crucially important in this application, the touchscreens can also be sealed to IP67/NEMA4 levels to prevent ingress of moisture or particles.

WHAT THEY SAID:

iMotion® is designed to attract and hold people's attention, and only Zytronic was able to deliver a touch sensor that could meet our ultra-large screen size requirements. PCT™ offers proven performance and delivers highly accurate operation through our protective glass cover, even with gloved hands, and durability in the most extreme outdoor environments. ZYTOUCH® fulfilled all our requirements and was unique in being able to support for our ultra-large screen requirements, with minimal effect on brightness...
