About Zytronic

The Group's operating subsidiary Zytronic Display Ltd ("ZDL") is a world-renowned developer and manufacturer of a unique range of internationally award-winning optically transparent interactive touch sensor overlay products for use with electronic displays in industrial, self-service and public access equipment.

ZDL's products employ a sensing solution that is readily configurable and is embedded in a laminate core which offers significant durability, environmental stability, and optical enhancement benefits to meet system-specific design requirements.

ZDL has continually developed process and technological know-how and IP since the late 1990's around two projected capacitance ("PCAP") sensing methodologies; trademarked by as PCT™ ("Projected Capacitive Technology") and MPCT™ ("Mutual Projected Capacitive Technology"), in which 15 internationally granted patents are held.

The Group is headquartered at Blaydon-upon-Tyne in the United Kingdom. ZDL operates from this site, providing its manufactured products globally through a number of sales channel partners. ZDL is relatively unique in the touch eco-system as it offers a complete one-stop solution including processing internally of the form and factor of glass and film substrates, the assembly of the associated touch overlay products, in environmentally controlled cleanrooms to customers' specific requirements and the development of the bespoke firmware, software and electronic hardware which links the manufactured touch interactive overlays to customer's integrated systems and product.

For more information about ZDL's technologies and products please see www.zytronic.co.uk and for information about the Group, please see <https://www.zytronicplc.com>
